Heading towards digital healthcare

Do you want to explore your product idea, receive feedback on usability, or clarify your direction in the healthcare sector?

Free collaboration with Diak Oulu Health Hub for North Ostrobothnia businesses:

1. **Discovery Meeting:** We will meet to review the current status and development goals of your company's digital product.Together, we will explore your product development goals, usability, and opportunities within healthcare operating environments.
2. **Product Demonstration and Trials with Students:** Bring your product into the hands of future healthcare professionals. We organize demonstrations and trial sessions with nursing students in learning and simulation environments. You will gain fresh insights, practical feedback, and new ideas on your product's usability and functionality from a nursing perspective.

Planning to start a business?
Get in touch and explore your idea's potential in healthcare.
